The Scrapping of International Politics

Sources: Rebellion - Image: Russian Mil-Mi-171 helicopter, one of those included in the agreement signed between Ecuador and the United States. Photo: Vitaly V. Kuzmin

Daniel Noboa does not he needed to move from Ecuador to travel to Kiev and align himself with the NATO. At least Milei had to travel all the way to Jerusalem and visit the Wall of Jerusalem. the Laments to show their alliance with Netanyahu.

We are living in a transition from unilateral U.S. hegemony, in the wake of the fall of the Wall, to a multilateral order, without defined hegemonies. We're in the middle of a global geopolitical confrontation. Pope Francis has pointed out that we are in a staggered Third World War between the West and NATO, led by the old powers, the United States-

European Union-Japan, front the BRICs and the Eurasian axis, led by the emerging powers, China-Russia-Iran.

In these conditions, the international policy of small countries like ours has to move very carefully, supported by two clear principles: independence, autonomy, sovereignty and non-alignment; and the agreement with the Latin American countries to promote a policy of peace and solution Politics of conflicts. We Have Background: Remember the Attitude Jaime Roldós, in the midst of a regional conflict, raised a initiative, known as the Roldós Doctrine, for the peaceful settlement of the Conflicts.

Scrapping of weapons of Russian origin by Daniel Noboa, to be delivered to the Government This is not an isolated act. There is a line of continuity with the Announcement of Plan Ecuador and the Agreements for the Entry of U.S. Troops in the Lasso government and the policy of the current government. Under the story of the war on terror: a policy of renouncing the sovereignty.

The current world war is not limited to military confrontation, but also takes other forms, such as the trade war. The problem is not only in the immediate economic costs, but also in the effects on banana and flower exports to Russia, which is our country's third largest trading partner.

The War announced by Russia, in the face of its involvement in the war by part of the Government of Ecuador, with the delivery of weapons that will reach Ukraine, affects the conditions of sustainability of our economy and the implementation of its own policy. The government's gaze is short-sighted. argues that it will not affect his group, since the Noboa Consortium does not export to Russia; It is not even interested in what is going to happen to the other exporters.

Scrapping of international politics makes us a country subject to mandates From the external domain, a new sale of the flag for \$200 million compensation. The Biden administration has failed to approve the aid offered to Zelensky, now he can use our country to deliver weapons for the war against Russia.

It's a delicate moment. The democratic counterweight bodies should act to control the international policy of the Executive. The Comptroller's Office should evaluate the declaration of the weapons involved as "scrap metal", even find out if there is a risk of embezzlement and economic damage to the State's patrimony. It has been reported, for example, that each helicopter to be delivered would cost \$30 million; a total of 360 million for the 12 million that are announced to be delivered, in addition to other types of weapons. The Assembly should urgently call on the Chancellor and the Minister of

Defence to report on the 'Russian scrap' case. Although it is difficult because of the tripartite co-government agreements that are working in the country.

The defense of the sovereignty, autonomy and non-alignment of our Homeland return once again to the conscience and hands of patriots. We can promote, from society, social movements, a policy of world peace, starting by demanding that the Nobao government stop the policy of involvement in a destructive world war.
